

List of Positions & Requirements:

EXPLORATIONS

1. Seismic Stratigrapher

- Minimum 10 years experience in related field.
- Possess Master Degree in Geosciences (Geology & Geophysics).
- Expert knowledge in sedimentology and depositional system and sound conceptual understanding of sequence stratigraphy.

2. Geochemist

- Minimum 5 years experience in related field.
- Possess Degree in Geo Science, Geochemical, Engineering or Mathematics.
- Skilled in Scientific Programming and numerical analysis with lab and field experience in geochemical, petro logical and mineralogical studies of fluid rock interaction.

3. Paleo & Biostratigrapher

- Minimum 5 years experience in related field.
- Possess Bachelor Degree in Geo Science, Geochemical or equivalent.

4. Geological 2D/3D

- Minimum 5 years experience in related field.
- Possess Bachelor Degree in Geo Science, Geochemical or equivalent.

5. Sedimentologist

- Minimum 5 years experience in related field.
- Possess Bachelor Degree in Geo Science, Geochemical or equivalent.
- Knowledge in Sedimentology and sequence stratigraphy.

6. Petrophysicist

- Minimum 5 years experience in related field.
- Possess Master Degree or Bachelor Degree in Geology, Geophysics, Engineering or related earth science discipline.
- Well-versed in a wide range of petrophysical techniques and data types.

7. Basin Modeller

- Minimum 7 years experience in related field.
- Possess Master Degree or Bachelor Degree in Geology, Geophysics, Engineering or related earth science discipline.
- Preferably have worldwide experience which involved basin modeling studies in various tectonic environments, ranging in scale from basin-scale evaluations down to individual prospects and lead assessment.

8. Play Analyst

- Minimum 5 years experience in related field.
- Possess Bachelor Degree in Geo Sciences, Geochemical, Engineering or equivalent.

9. Seismic Interpreter

- Minimum 10 years experience in related field.
- Possess Master Degree or Bachelor Degree in Geo Science, Geochemical, Engineering or equivalent.
- Well versed in Geophysics, Seismic interpretation attributes analysis and Seismic processing.

10. Drilling Supervisor

- Minimum 10 years experience with drilling, work over and completion operations.
- Possess Bachelor Degree in Engineering or equivalent.
- Extensive knowledge in drilling techniques, systems, procedure and standards.

11. Drilling Superintendent

- Minimum 10 years experience with drilling, work over and completion operations.
- Possess bachelor Degree in Engineering or equivalent.
- Extensive knowledge in drilling techniques, systems, procedure and standards.

12. Drilling QA/QC

- Minimum 10 years experience in related field.
- Possess Bachelor Degree in Engineering or equivalent.
- Establish implementation of Integrity Assurance specification, especially by review of supplier Quality Control Plans and Inspection Matrices.

13. Drilling HSE Specialist

- Minimum 7 years experience in related field.
- Possess Bachelor Degree in Engineering or Occupational Safety and Health or equivalent.
